RESERVE glass list

At Duende we're committed to providing our guests with a vast array of exciting beverage options. We also love a gadget, so we've combined the two to bring you this – our premium selection of wines by the glass

Each glass is poured through argon gas using the Coravin™ wine-save system, to ensure every drop is preserved. The system works by infiltrating the bottle via a hypodermic needle through the cork. When the needle is removed, the cork is resealed, preventing any oxygen from entering the bottle.

Thus, we can offer you some very special wines to try **by the glass** at accessible price points!

Ask our knowledgeable team if you wish to know more about any of the wines in the range, or the Coravin™ system.
